PROFILE

As a front-end developer with one year experience in HTML, CSS, JavaScript, Bootstrap, Sass, jQuery, and React JS, I take pride in crafting responsive, user-friendly websites. My focus is on implementing modern web technologies to create solutions that are not only high-performing and well-coded but also scalable. I'm dedicated to staying up-to-date with the latest industry trends and innovations, always striving to enhance user experience across different platforms while adhering to best practices.

WORK EXPERIENCE

Front End

Acme web technology, Delhi

21 May 2023 to 5 June 2024

- **Crafted Responsive Websites:** Designed and maintained mobile-first, responsive websites using HTML5, CSS3, and JavaScript, ensuring a smooth and consistent experience across different devices and screen sizes.
- **Built with React.js:** Developed dynamic single-page applications using React.js, focusing on creating reusable components and managing state to keep the apps scalable and high-performing.
- **Boosted Performance:** Enhanced website speed and user engagement by implementing techniques like lazy loading, code splitting, and minifying assets, which resulted in faster load times.
- **Integrated APIs:** Worked on integrating RESTful APIs into front-end applications, facilitating smooth data exchange between the front-end and backend services.
- **Collaborated on Version Control:** Worked closely with my team using Git and GitHub, managing branches and pull requests to keep our codebase clean, organized, and easy to work with.
- **Partnered with UI/UX Designers:** Collaborated with UI/UX designers to turn their mockups into interactive and visually appealing web pages, always aiming to create user-friendly designs that work well in practice.
